MODERN NAMED PELARGONIAMS *and* GERANIUMS

*“The favored flower
of a century.”*

Ivy Leaved, Scented, Novelties,
Variegated Foliage and many
Standard, New and Choice Var-
ieties of Zonale Classes.

CARLTON VILLA NURSERIES
P. O. BOX 183 HIGHTSTOWN, N. J.

MODERN GERANIUMS
 "The favored flower of a century"

Now more beautiful than ever, in new colors and lovely foliage. We list a brief description of many standard, new and choice varieties, including Zonale or Garden Geraniums, Lady Washington or Domesticum varieties, and also special Novelties, Ivy Leaved, Scented and Variegated types.

We do not know of any other flower or plant which will grow more beautifully with less care than the modern types of Geraniums and yet give you a marvelous array of all colors and blends. They are adoptable to any sunny indoor window or outdoor window box. They are perfectly at home in any of your flower gardens. They will bloom profusely all summer long. No other flower will give you so much enjoyment today as a "Hobby Collection" of many different kinds. Each will vie with the other to give you a wonderful array of color. Make early plans now to plant many of the newer varieties this year.

Geranium blooms make wonderful cut flowers especially the Zonale types. They are long lasting. The modern improved Lady Washington types are ideal for Nosegays and corsages. Surprise your friends this year with beautiful boquets of the new and different color combinations of lovely Geranium blooms.

Many of your friends will appreciate a gift of a dozen Geranium plants on Birthdays, Anniversaries, Mothers Day, Fathers Day and Decoration Day. Also at any other time that a gift would be appropriate. Growing plants that will bloom are a lasting remembrance. We will enclose a suitable greeting card with your best wishes and your name.

We can make up a special assortment for you our choice (all named varieties) and thus give you extra value below catalogue prices. We can make up special color combinations for you.

GENERAL INFORMATION ON ORDERING

We ship out only strong started plants with good roots. Larger sizes on special order only and then by express collect. We do not sell cuttings of any kind. Our plants are husky pot plants, lots of roots and ready to grow fast. They are ready for the flower bed outside or 4" pots inside. Each plant is shipped with a small ball of dirt whenever possible. Upon arrival they should be potted immediately, watered thoroughly and placed in a light shady window for two or three days to recover from the shock of travel.

Please specify 3 or 4 substitutions as many varieties are always in propagating beds and may not be ready for shipment when your order arrives. We may delay shipment for three or four weeks in order to give you stronger plants but we will notify you immediately and advise you when shipment will be made. We can always arrange to rush a shipment if you need it for special occasions.

We cannot accept an order for less than \$2.00 on account of excessive handling charges.

All shipments will go forward by parcel post pre-paid with the exception of Organic Compost Potting Soil. Include at least 25¢ for postage and handling on this item. It cannot be shipped to distant points beyond the third zone.

Order as early as you can. Specify shipping date. We will hold shipment until you are ready. The extra time you give us in planning for your shipment will result in better established plants for you. We will reserve the plants for you when your order is received.

Listed in this circular are brief descriptions of each variety. It should be understood that many factors influence Geraniums including soil and weather conditions. This might effect the size and the coloring of the flowers. The first flower on a small plant does not represent the variety properly either in size or color. Don't judge them until they are grown up.

All plants are carefully labeled on the individual wrapper with a number. Checking sheet and planting instructions are enclosed with each order.

All plants shipped to you are about the same age. Fast growing varieties are large. Slow growing varieties are smaller and dwarf varieties are sometimes only two inches high when shipped.

ZONALE OR GARDEN VARIETIES

1. ALPHONSE RICARD
Very large semi-double pure scarlet flowers. Large strong plant. \$.35
2. OLYMPIC RED
Very bright light scarlet large flowers. Heavy plant. .40
3. MME. BUCKNER
A free flowering easily grown bushy plant. Double white flowers. .35
4. BEAUTE DE POITEVINE
Strong bushy plant. Flowers salmon-apricot. Semi-double, very good. .35
5. BETTER TIMES
Beautiful double flowers of bright crimson. Bushy plant. A very vivid display in beds. .35
6. SALMON IDEAL
Lovely deep apricot-salmon. Many high lights of color in sun. A bushy, strong growing plant. .35
7. MME. LANDRY
Flowers apricot-salmon, very free blooming. Withstands extreme heat. Very free bloomer during entire season. Large flowers. .35
8. RADIO RED
Rich velvety red, flowers profusely throughout the entire year. Excellent for beds or as a pot plant. Very compact plant. .40
9. JEAN VIAUD
Dwarf compact plant. Flowers large, a clear shade of mauve rose, shading to a distinct white throat. Semi-double. .40
10. MARQUIS DE MONTMORT
A very beautiful deep crimson with a touch of white in the center. Large heavy flowers, strong deep zoned foliage, a striking variety .40
11. IRVINGTON BEAUTY
A soft rosy-pink semi-double flower set off by very light green foliage. Ideal as a pot plant. Free bloomer of very dwarf habit. .40
12. AMERICAN BEAUTY
A vivid scarlet-cerise. Semi-double large flower. Perfect for a showy pot or bedding variety. Blooms freely all Summer. A perfect variety to train into tree form. .50

ZONALE OR GARDEN VARIETIES (Cont'd)

13. APPLE BLOSSOM
Large soft pink flowers shading lighter at the edge, Just like an apple blossom. A very profuse bloomer, semi-dwarf. Very vigorous habit. .50
14. AURORA
A very compact French-type Geranium with big double scarlet flowers with a small white eye. A wonderful cut flower with long strong stems. .40
15. BERTHE DE PRESILLY
The best of all pinks for beds, handsome light green foliage topped with soft glowing silver rose-pink double flowers. One of the best. .50
16. DOUBLE DRYDEN
A fancy pot plant. A unique color combination of crimson with coral white center and shadings of lilac in each petal. A bushy plant. .50
17. FIAT
One of the very best with beautiful foliage and flowers of a very clean clear light salmon. A great flower producer. .40
18. JEAN OBERLE
A very light double pink shading out to white. A small plant with huge heads of flowers of a beautiful shade. At home in the sun. .40
19. MARQUIS DE CASTELLANE
A heavy rich clear red. Very large semi-double flowers. Foliage rich and heavy. A strong grower. One of the best reds. .40
20. LOUISE
One of the largest Geraniums known. An ideal pot variety. Great large flowers, semi-double, of rich clear scarlet, glossy green foliage. .40
21. MME. BARNEY
A perfect bedding and pot plant, very dwarf and branching. Blooms very freely in a lively shade of pure pink. .40
22. MISS F. PERKINS
A well known favorite with rosebud pink shading to a white throat. A very free flowering new variety. .50
23. MRS. LAWRENCE
One of the loveliest of all Geraniums of a bright salmon pink. Wonderfully free in flower. An ideal pot plant for winter blooming. .40

ZONALE OR GARDEN VARIETIES (Cont'd)

24. MRS. RICHARD GLOEDE
A choice variety for any collection.
Real large flowers of clear American
beauty pink held high above the foliage
of glossy dark green. .40
25. PINKAABUNDANCE
A wonderful flower of medium size on
long stems for cutting. A rich rose-
salmon-pink blend. A free bloomer for
quick results. .35
26. PINK PHENOMENA
A giant flower of mauve pink with white
throat on a dwarf compact plant with
dark green foliage. A lovely combin-
ation of colors for any collection. .50
27. PRIDE OF CAMDEN
An old variety of excellent deep crimson
or dark red. A compact plant excellent
for pots, and it blooms constantly through
out the year. .35
28. MAGENTA RUBY
A dark sparkling red wine color.
Flowers medium size carried on very
long stems. A free bloomer. The best
red for cutting all season. .40
29. S. A. NUTT
The best one for bedding. A compact
grower and a favorite with all flower
lovers. Flowers velvety dark red.
Often seen in big park display beds. .35
30. SUZANNE
Flowers of medium size of cerise-
magenta carried well above very sharply
zoned two-color foliage. It prefers a
half shady location. .50
31. SALMON SUPREME
Semi-double flowers of light salmon-
apricot. Very large flowers and lots of
them on a bushy plant. It is fine for
either pots or bedding. .35
32. PICARDY
A very fine salmon pink. Extra large
semi-double flowers. Resembles the
Gladiolus in color and named for it. .50
33. DOUBLE LA FRANCE
One of our favorites. Just every shade
of pink and white beautifully blended.
Large proud very double flowers. Very
fine for cutting. A splendid potting plant. .40
34. MON.EMILE DAVID
A vivid violet-rose with each petal
feathered white. One of the largest
Geranium flowers in existance. A
strong, healthy, bushy plant. .50

ZONALE OR GARDEN VARIETIES (Cont'd)

35. MARYLAND
A fiery red blossom of marvelous beauty. A compact, dark green, bushy plant that will meet every requirement of a first class GERANIUM. .50
36. MICHELLE'S SENSATION
Soft scarlet blooms on very long stems. Considered one of the best for cut flowers. Flower bunches grow to enormous size. One of the finest for pot plants. A sure bloomer with distinctive foliage. .50
37. SANTA MONICA
This is a large single flower of scarlet shading to white center. The plant is of moderate growth but the clusters of flowers are large. A beautiful variety and very distinct. .50
38. MAXIME KOVALEVSKY
A fine large vigorous plant with very handsome foliage. The flower is a beautiful orange. Very bright and striking color. Almost a polished brass color. Flower heads held high in large clusters. Very distinct and graceful variety whether in pots or in borders. .50
39. SUZANNE LEEPPE
This is a fairly rare variety with flowers of aurora salmon. The flowers are large and in large clusters and single. The plant is a robust grower and a continual bloomer. Suitable for all locations. .50
40. MRS. E. G. HILL
An exquisite shade of large salmon flowers. This is a favorite plant where ever shown and is a very free bloomer. The flowers are held in large clusters. The plant is very vigorous and large. .50
201. WYONA
An extra fine semi-double scarlet red. Very large flowers on a large plant. This variety is similar to Ricard but the flowers are more double and slightly softer in color. .50
202. MARVEL
Double flowers of red to scarlet-red. Flowers are medium large. The plant is very robust and tall. This is a brilliant old standard variety that has stood the test of time. .50
203. SHELL PINK (SPRINGFIELD)
Large double flowers of a light pink with slight orchid shading. Some flowers show a little white in the center. The flowers are slightly cupped at times and very much resemble their name. A well shaped plant for indoor blooming. .50

ZONALE NOVELTIES

41. RED POINSETTIA
Beautiful deep red double flower with narrow, rolled and twisted petals. Each flower resembles a miniature cactus type Dahlia flower. Each flower also closely resembles a tiny Christmas Poinsettia bloom. Sometimes called "Raggety Ann". Very different from regular Geranium blooms. Plant very compact and free blooming. It is a "MUST" for every collection. .75
42. CARNATION
In this Geranium the margins of the petals are toothed, resembling small Carnations or Sweet Williams. Each flower is a bright salmon. Flowers are single but grow in good size clusters. It is a very bushy plant and very interestingly different. Flowers freely all through the year. .50
43. LITTLE DARLING
This is a dwarf type Geranium with single rose-pink flowers with a white center. Very seldom grows to more than 12" in height. Very light green, scalloped leaf. Naturally very short, bushy and compact. Flowers short stemmed usually in clusters of six. Makes a very attractive edging plant. Very suitable for pots. 1.00
44. STARS AND STRIPES
Sometimes called "Peppermint Stick" because each leaf of each flower is a combination of bright red and snow white and on most plants each petal is differently marked. Sometimes a whole red petal will appear in a solid white flower but usually every flower is streaked with red and white. This is really a novelty and very interesting. A very free flowering compact plant. Double flowers. 1.00
45. NOEL "WHITE CACTUS"
A brand new pure white cactus flowered Geranium. Strong stems and more branching habit than the red Poinsettia. Free blooming, even small plants in small pots will bloom. This is the first time ever offered to the trade. You can really create some excitement in your collection by alternating Poinsettia and Noel in your window boxes and really know you have some thing different. 1.50
46. FIAT QUEEN
Carnation type, similar to number 42, but a beautiful double salmon pink. Each petal of each flower very distinctly toothed around the edge. The plant is very bushy and compact and very free flowering. Highly recommended for exhibition pot specimens. You must see it. .50

ZONALE NOVELTIES (Cont'd)

47. ROSEBUD

In this Geranium the flowers never open wide, they resemble clusters of tiny, half open roses. They are a very double flower just packed with pretty petals. In color these medium sized flowers are a light scarlet red. The plant is compact and rather slow growing but flowers well throughout the year. This is a "must" for every good collection.

.75

IVY LEAF GERANIUMS

These varieties can be kept bushy and compact only by continuous pinching. Their beauty lies more in their trailing habits and they are ideal as hanging pot plants. Used extensively in England on balconies and to decorate stone walls. Very charming for sun room brackets and corner shelves. A most graceful type growth with numerous bright flowers.

51. ALLIANCE

The flowers are lilac-white with rose markings, rose-bud type buds. This is a close jointed variety with excellent habits. Easily trained to stay compact.

.35

52. CHARLES TURNER

Double, strong rose-pink. A free bloomer of large flowers on long stems. This most popular rose pink of very graceful trailing habits is ideal for hanging pots.

.35

53. ENCHANTRESS

A very attractive flower of lilac coloring with the upper petals of maroon. This plant has splendid habits and is easily trained for upright or trailing growth.

.50

54. GORDONS GLORY

Bright scarlet flower on long stems. Some times flowers are striped with white. A very attractive plant of short heavy growth suitable for fancy baskets or vases.

.40

55. JEANNE D'ARC

Long, bushy, dark foliage with very pale lavender, red striped flowers. This variety does very well in a semi-shady location. An exquisite color combination for any choice hanging pot.

.35

56. JOSEPH WARREN

Large flowers of a rich royal purple. A very distinct and striking variety for half shady locations. Growth can be kept short and compact.

.50

57. BRIDESMAID

Double soft orchid pink with small spot on upper petals. Very large flowers on long stems. Fine cut flower. Vigorous long growth.

.75

IVY LEAF GERANIUMS (Cont'd)

57. BRIDESMAID
Double soft orchid pink with small spot on upper petals. Very large flowers on long stems. Fine cut flower. Vigorous long growth. .75
58. BRILLIANT
A clear bright salmon-red flower of large size. A good trailing plant for hanging pots. .35
59. ALBA
A large pure white flower with a touch of lavender in the throat. Good trailer. .35
60. BLUSH
A delicate clear light pink single flower. Blooms freely. A fine hanging vine type or climber. .35

LADY WASHINGTON OR DOMESTICIUM

These are by far the most beautiful of all the Pelargonium family to which all Geraniums belong. Plants properly tended will grow to be two feet tall and very bushy in a season, covered during the summer with quantities of magnificent velvet-textured flowers from three to four inches across. They remind one of hugh swiss pansies. Individual flowers are usually single and made up of five large petals like a pansy. They should be grown in a temperature of not over 60 degrees and are splendid for shady nooks in your sun porch or in your garden. The flowers are long lasting and make beautiful boquets and corsages.

61. MARIE ROBER
A large flowering spectacular variety with dark magenta shading to black flowers. A very popular variety and probably the darkest of all. .50
62. SUE JARRETT
Unusually large flowers with the lower petals veined and spotted dark maroon. The upper petals are shaded from rose to salmon pink. A good bedding and pot plant variety with bushy growth. .50
63. HAILE SELASSI
A beautiful dark rose and violet pansy type with a light center. Dark blotches appear on the lower petals. A very rich velvety flower you must have. .50
64. CARMEN QUEEN
A very vivid carmen red. Large glowing flowers with two dark blotches on the lower petals. A compact, bushy plant. Highly recommended as a free bloomer in cool locations. .50

LADY WASHINGTON OR DOMESTICIUM (Cont'd)

65. EASTER GREETINGS
One of the earliest to bloom in the spring. Flowers are a very soft cerise-pink with black markings toward the center of each petal. One of the older standard varieties noted for its free blooming qualities. .40
66. EDITH NORTH
Color salmon pink, shaded deeper on the upper petals, dark brown blotches. It is a very vigorous tall grower, and it holds its trusses of large flowers well above the foliage. .40
67. AZALEA
Large clusters of large flowers. A bright rosy-red with the upper petals marked crimson and the lower petals of rose-pink. A favorite low bushy plant of free flowering habits. .40
68. MRS. LAYAL
This is one of the Original Martha Washington type pansy Geraniums. It makes an excellent pot plant of short compact growth with many small purple, rose and white blended flowers. .40
69. SPRING TIME
A very popular ruffled flower of dainty pink with a white throat, and border. One of the earliest to bloom. .40
70. GERMAN GLORY
Large clusters of amaranth pink flowers. The upper petals have veins and spots of violet. Robust growth and a splendidly shaped plant. Resembles an orchid. Very good for corsages. .50
71. SANTA MONICA
Very large flowers of a true soft delicate pink. The upper petals each have a bright red mark. A very free bloomer and one of the earliest. .50
72. SALMON SPRINGTIME
The color is a beautiful salmon rose-pink, much darker than its parent "Springtime". An excellent early variety. .50
73. MARIE VOGEL
Very large flowers slightly ruffled. Bright red shaded with salmon, with dark brown blotches on the upper petals. One of the very best free bloomers and very early. .50
74. PINK VOGEL
Same habits as Marie Vogel, but the very large flowers are of a beautiful shrimp pink with two red blotches on the upper petals. .50

LADY WASHINGTON OR DOMESTICIUM (Cont'd)

75. ORCHID EDITH NORTH
An orchid pink sport of Edith North.
Darker blotches on the two upper petals.
Strong, upright healthy grower and an
early bloomer. .50
76. LUCY BECKER
A beautiful lavender pink with the top
two petals heavily veined with velvety
crimson lines. Large ruffled flowers.
Very refined. A very compact plant
that blooms early and late. .50
77. PROF. CORRENS
A bright clean cherry red with two large
black dots on the lower petals. Petals
of each flower are fluted. Large flowers
held high on a very bushy plant. A
striking corsage or boquet. .50
78. ANDENKONAN MOSLOW
Very large dark royal purple pansy
type flower. Each petal has a darker
center. An aristocrat that must be seen
to be appreciated. .50
79. MACKENSEN
Large flowers of rose-pink with upper
petals veined and crimson-marked.
The lower petals are crimson and orange-
marked. The large clusters of large
flowers are carried high above a very
shapely plant. .50
80. GERALDINE
A bright clear pink on a white center.
The upper petals are blotched. Very
large slightly ruffled flowers. Excellent
for pot culture. A spreading medium
plant with large foliage. .50
81. LUCY ANNE LESLIE
A large beautifully ruffled flower of a
deep pink. Each upper petal is veined
red from its base to the crimson center
spot. This is one of the popular varieties
much in demand for corsages. The large
flowers resemble orchids when clustered. .75
82. DARK ORIENTAL
A very interesting dark oriental com-
bination of purple and Magenta. A
heavy, striking color combination.
Reminds one of a beautiful Chinese robe.
A very attractive exhibition pot plant. .75
83. MRS. MARY BARD
A snow white pelargonium with very fine
cerise markings at the base of each
petal. One of the most popular. Very
large foliage on shapely plants. Ideal
for pot culture. Growing dark oriental
and Mrs. Bard near each other makes
a magnificent contrasting display. .75

LADY WASHINGTON OR DOMESTICIUM (Cont'd)

84. GRANDMA FISHER

This is one of the very fine imported varieties from a famous breeder. Flowers are very large and early and are beautifully waved around the edges of the petals. The color is salmon, penciled and marked with dark brown blotches. A splendid exhibition pot variety for every collection.

.75

SCENTED LEAF VARIETIES

In these odd and very interesting Geraniums the leaves are sweet scented. On most of them except where noted the flowers are small and insignificant. They are indeed the "flower of a century" because over a hundred years ago Grandmothers used rose Geranium leaves at the bottom of each glass of apple jelly to give it an intriguing flavor. A sprig of lemon Geranium is "just the thing" to float in a finger bowl. Many a linen drawer has its jar of fragrant potpourri to give a refreshing aroma to bed linens and clothing. Make your own particular blend. It is easily prepared by carefully drying the leaves of a dozen varieties of these aromatic spicy scented Geranium leaves. Most all of the varieties emit a spicy odor when the leaves are bruised very slightly between the fingers. You "must" have some in your collection.

101. OAK LEAF

A pungent scent of the oak forest. The leaves are bold and round-lobed of rough texture. Shaped exactly like the Giant oak leaf of the forest. Each leaf has a wide purple marking through the center. A very striking variety with very small lavender flowers.

.50

102. TOMENTOSA

Large soft velvety leaves, the shape of grape leaves. A true refreshing peppermint scent. Very highly scented. Tiny white flowers with purple veinings.

.50

103. OLD FASHIONED ROSE

A deeply cut heart-shaped leaf. Leaves very fragrant rose with a slight lemon scent. This variety was formerly used to make an imitation "oil of roses". A vigorous plant with small orchid flowers. This is the variety used for flavoring and the base of all potpourri. You should have several.

.35

104. PINE SCENTED

A very clean refreshing pine scented leaf. The leaves are small three-lobed and crinkled. The plant is compact and is covered during the summer with sprays of tiny white flowers with red spots on the upper petals. An envelope of dried leaves of this variety is very refreshing in a drawer of bed linen.

.60

SCENTED LEAF VARIETIES (Cont'd)

105. FINGER BOWL GERANIUM
A strong lemon scent. Very refreshing. Very small leaves that are attached directly to the stalk with no stem between. Each leaf is curled and fluted and of a bright crisp green. It is a tall plant resembling a miniature evergreen with small pale lavender flowers. .35
106. NUTMEG
A very pleasing odor similar to its name. The leaves are small, slightly lobed, round, gray and crinkled. The flowers are very tiny white ones with a touch of red on the upper petals. The dried leaves of this variety add a very delicate aroma to any mixture of potpourri. This is a very good one and a "must" for the collection. .60
107. APRICOT
The leaves of this variety are dark, glossy and rather pointed. They are deeply toothed and irregular. The odor is very pungent and fruity. This variety carries large and very lovely brilliant rose flowers with darker pencilings. Very good. .50
108. CAMPHOR ROSE
An intriguing combination of rose and camphor. Leaves are five lobed and daintily cut and toothed. A tall growing and yet compact plant. The flowers resemble lavender wood violets with ragged edges. .50
109. CLORINDA
A pleasingly pungent eucalyptus scented variety with rather large three lobed crenate leaves. A very compact plant. This scented Geranium has the largest and most beautiful flowers of all this class. They are brilliant cerise flushed with orange. This is very good for dried leaf perfume. .60
110. COCOANUT
A small smooth dark leaf with a very good scent of freshly opened cocoanut. The plant is rather small and compact, and is literally covered in the summer with the tiniest of magenta flowers in clusters. .50
111. LIME SCENTED
Small, smooth, dark green sharply toothed leaves with gray "frosted" stems. A very pleasing refreshing lime scent. The plant is very compact and the flowers lavender with dark markings. Very different. .50

SCENTED LEAF VARIETIES (Cont'd)

112. PRINCE OF ORANGE
A compact and very showy plant with rather small crenate leaves. This plant grows quite large and has pale orchid flowers with a large maroon stripe on each upper petal. The leaves when crushed are a combination fragrance of orange blossoms and fresh fruit. .60
113. APPLE SCENTED
This scent is of the apple fruit and not the apple flower. The aroma of a fresh apple could not be sweeter. Crisp, light green oval leaves with a heavy velvety feeling. A compact plant with vine like flower branches and tiny white flowers. This is a collectors "must". .50
114. LITTLE GEM
A pungent odor of evergreen branches. A three lobed leaf with many fine divisions, light green. Compact low growing plant. A free flowering variety of lavender rose, upper petals spotted deeper and veined purple. A very attractive plant and a very different scent that should be in every collection. .50
115. PRETTY POLLY
A nutty aroma of almonds and walnuts. A very pretty plant that grows in compact mounds. Medium size leaves sharply toothed with five lobes. Very rarely does this attractive plant show its lovely pink, maroon spotted flower, but it is still the perfect little collectors item. .75
116. SCHOTTESHAM PET
Another very nutty scented variety with the aroma of filberts. The leaves are five lobed, rather pointed and of a light green color and are carried on frosty, hairy stems. The beautiful foliage and small bright rosy flowers make this a very attractive plant for any collection. .60
117. GINGER SCENTED
A pungent spicy ginger scent. Large light green round leaves with a toothed edge, held high on gray "frosted" stems. The flowers are very showy and of a lavender rose. .50
118. MAPLE LEAF
This is another very pungent spicy scented variety which is a "must" for all potpourri mixtures of dried leaves. The leaves are handsome and resemble those of the maple shade tree, deeply five lobed and light green. This plant makes a beautiful exhibition pot variety. Lavender flowers arrow-shaped, carmine markings on the upper petals. .75

SCENTED LEAF VARIETIES (Cont'd)

119. PRINCE RUPERT "VARIEGATED"
A very pleasant lemon scent. The leaves are small and smooth but each has a very definite yellow edge. Flowers lavender with the upper petals streaked with carmine. A fine handsome pot plant with both a delightful scent and variegated foliage. .75
120. P. CRISPUM
A marvelous lemon rose scent. Small curled and fluted leaves, crisp green with long petiole. A tall narrow plant with pale lavender flowers. .50
121. DR. LIVINGSTON
This variety is also called SKELETON ROSE. It is a beautiful plant with fairly large seven lobed finely cut leaf. It is a vigorous growing plant. It has lavender flowers with two purple spots on each upper petal. It is very pungent with a combination of lemon and rose. A large plant looks something like a fern. .75
122. ROBER'S LEMON ROSE
The leaves of this fine plant are just the opposite from SKELETON ROSE inasmuch as they are heavy and very irregularly lobed. They remind you more of an oak leaf. It has medium sized lavender flowers with tiny brush marks along the upper petals. The plant is very compact and the foliage very dark green. A very spicy pleasing leaf fragrance of lemon, orange, lime and rose. .75

VARIEGATED OR FANCY LEAVED GERANIUMS

Most fancy leaved varieties color up best in a well drained soil with a fairly even amount of soil moisture. They should be displayed in a sunny window. Give each variety as much sun as it will stand without bleaching or burning the leaves. The size and coloring of the leaves vary considerable in a given variety. The new leaves are the most colorful and they are usually their best in a cool room. They are beautiful throughout the entire year, whether they bloom or not. In fact they are better when out of bloom because some times the flower color clashes with the beautiful coloring of the leaves.

131. **HAPPY THOUGHT**
 The typical leaf is very light green with a large irregular golden center surrounded by a deep olive ring. It is often called "Yellow Butterfly" because the yellow blotch in the center of the leaf resembles closely the large yellow summer butterfly. A vigorous upright grower with small single bright cerise-red flowers. It grows well and seems happy with any location and little care. .60
132. **MADAME SALLERON**
 Small crinkly leaves the size of a silver dime of a silvery green. Each leaf has a wide snow white border like a tiny bit of ruffled lace. To us this is the perfect little lady of all Geraniums. The plant is very compact. It grows slowly and is almost in the dwarf class. A year old plant will not be over 12 inches high and will have at least 200 leaves closely nestled against each other. Only rarely does it produce a small single pink flower. It "must" be in your collection. .60
133. **MISS BURDETTE COUTTS**
 The finest silver tri-color and one of the most outstanding of all the fancy-leaved Geraniums. Two toned green center encircled by a colorful irregular band of ripe olive, red and green, in sectional splashes, all of this surrounded by a creamy yellow or white gold border. Low, slow, bushy growth, excellent for pot culture. Small single light red flowers. An absolute "must" in every collection. 1.50
134. **MRS. LANGUTH**
 Silvery green leaves bordered with white with a faint horse shoe zone of dark coloring. Altho the flowers of most fancy leaved Geraniums are a secondary consideration of the leaves, the flowers of this variety are large, double, and rosy cherry red. The best flowers of this class. A magnificent pot plant for the whole year. 1.00

VARIEGATED OR FANCY LEAVED GERANIUMS
(Continued)

135. SKIES OF ITALY
Each leaf has a two toned green center encircled by an irregular, wide zone of bronze blending into green. This zone is splashed with salmon-red and each leaf has a creamy yellow edge. Each leaf beautifully like the leaf of the maple shade tree and to a certain extent it looks like an autumn leaf. A strong growing plant that loves the sun. It is full of small single light red flowers during the summer and fall seasons. .75
136. CLOTH OF GOLD
Very aptly named, but leaf color varies considerable. At times it is a deep golden yellow and other times a yellow green combination. Should be kept in a bright cool room to bring out the most attractive clear yellows in many shades. The small single scarlet flowers make a beautiful color combination against the background of deep golden leaves during its blooming season. .75
137. DISTINCTION
The leaf of this plant reminds you of a small Gooseberry leaf. It is round, ruffled and light green with a sharply toothed edge. On each leaf is a very clear cut narrow dark reddish brown ring. This zone encircles the leaf very near the edge. A very strong growing plant with small rosy red flowers. .60
138. MOUNTAIN OF SNOW
A silvery green leaf of good size with a pure white border. This is considered one of the finest of the many silver leaved Geraniums. The leaves remind you of the garden plant called "Snow on the Mountain". Flowers abundantly in the summer with small bright red blooms. .60
139. MRS. POLLOCK
The best known of the Golden tri-color Geraniums. Each leaf has a green center surrounded by a wide irregular zone of bronze, salmon-red and deep green. Each leaf is edged with a bright light golden band. A wonderful bedding variety and fine for exhibition pots. The flowers are small, some are single and some double of orange and scarlet. 1.00

VARIEGATED OR FANCY LEAVED GERANIUMS
(Continued)

140. MRS. COX

This variety resembles Mrs. Pollock but the leaves are much larger and scalloped instead of slightly maple shaped. The broad zone of color combination spreads almost to the edge of the leaf at points leaving a very narrow yellow border in some places. This is by far the most brilliant, and the rarest of all the fancy leaved Geraniums. A magnificent golden tri-color. The plant is strong and tall growing with small single pink flowers. This is a new variety you will be proud to own.

141. BRONZE BEAUTY

Leaves are yellow-green with a bright rust-red horse shoe zone. Each leaf is beautifully scalloped. This is a very striking combination of coloring. Plant is rather small and compact. Small single scarlet flowers. Both flowers and leaf coloring stand the sun and hot weather very well. You will like it a lot.

.60

142. FLOWERS OF SPRING

Each leaf of this very tall and shapely plant is splashed and variegated green and white. This gives the plant a marbled look. Each leaf is daintily scalloped. This is one of the finest of "The Silver-Leaved", bright vermilion flowers some what semi-double and of fair size. Some of the smaller plants may show very little variation. The beautiful color combination develops as the plant matures.

.75

Please note- sometimes the color fades out on these variegated Geraniums during shipment when they are wrapped up for several days. On all Geraniums the leaves have a tendency to turn yellow during shipment. Most of them will recover their color quickly when potted. Don't harshly judge any Geranium until you have grown it well for three months.

ORGANIC COMPOST POTTING SOIL

A wonderful change for all potted plants. A natural plant food composed of rich garden soil, Organic Compost compounded according to the latest scientific facts and sand. To this mixture is added hardwood ashes and leaf mold.

This combination of nature's organic ingredients is then shredded by modern machinery, thoroughly mixed and screened. The result is a soft, fluffy, rich dark plant food that will hold moisture well and yet it is heavy enough for all flowering pot plants and ferns.
